Fleet diversity, cutting-edge technology, and unique property and liability hazards pose many insurance challenges. Each state has exemptions to auto laws or regulations that represent a collection of safe harbors, or defenses, from potential liability that would otherwise apply, such as when farm vehicles and farm machinery are being operated on public roads. A Farm Liability policy typically only provides coverage for defense and damages arising out of the use of farm vehicles and farm equipment while being used for "farming." Evaluate the Personal Auto, Business Auto, Farm Liability, and Mobile Equipment Coverage forms to identify when a client needs to modify coverage.

People in the United States are living longer today than ever before. They want to enjoy life, travel, hobbies, and their families not only during their working careers, but also once they've stopped working. Their retirement money needs to be sufficient to allow them to pursue these activities, as well as face the health consequences of getting older. The amount of money needed to address these issues needs to last much longer than it did in previous years. That requires careful advance preparation. In this course, we will discuss that preparation, and investigate the history and future of retirement planning.

Insuring Hobby and Small Farms			Course #17001318
Instructor: Keith Wilts, CPCU, CIC	April 29	12 PM - 3 PM	3 P&C hours

The key distinguisher for hobby farming is that it is a not-for-profit motive, even though a profit may be realized. Hobby farming is pursued primarily for pleasure or recreation. Loss exposures, including farm equipment, farm buildings, animals or livestock, farm workers, and operation of a road-side stand or participation in farmer's markets clearly create the need for farm owner policies vs relying on homeowner's insurance. Farm owner's Property and Liability coverages will be discussed and applied to real life case or claims examples. Automobile coverage will also be reviewed to address the related farm vehicle and off premises exposures.

Examine the difference in valuation methods based on Actual Cash Value, Replacement Cost, and Agreed Value. Evaluate significant differences in the level of protection for owned versus non-owned motorized "toys" under a homeowners policy. Examine how a personal umbrella policy can help fill in the potential coverage gaps.

Insuring Trusts - Protecting Your Client's Wishes			Course #17001813
Instructor: Paul Burkett, J.D., CPCU, CIC	February 19	8 AM - 11 AM	3 P&C hours

The use of trusts is becoming the standard practice for individuals and households who hold any appreciable asset. The principal attraction of trusts is that they allow property to be passed down to heirs or transferred to others more quickly and at less cost than a will. Under a trust agreement, assets can pass immediately from the grantor (or donor or settlor) to the beneficiaries without having to go through the cost and public disclosure of probate. This course is designed to provide participants with an understanding of the insurance implications that exist for clients who have established a trust. The course includes a comprehensive review of trust terminology, types of trusts, parties involved, and resultant property and liability loss exposures. Commercial and personal lines coverage options will also be examined, along with real life case examples regarding how each can be used to address particular liability and property needs.
